Education

Arizona State University Tempe, AZ
M.S. in Computer Science – GPA: 3.889/4.00 *Aug. 2025 – May 2026*

- B.S. in Computer Science – Magna Cum Laude, GPA: 3.78/4.00 (Jan. 2022 – May 2025)

Experience

Cloudflare Austin, TX
Systems Engineer *Oct. 2026 – Present*

Cloudflare Austin, TX / Remote
Software Engineer Intern, Emerging Technology & Incubation *June 2026 – Sept. 2026*

- Worked on engineering tooling and platform systems within Cloudflare's Emerging Technology & Incubation team.
- Built developer-experience and infrastructure systems for production-grade workloads in the Cloudflare ecosystem.

Arizona State University Tempe, AZ
Engineering Tutor, Instructional Aide, and Undergraduate TA *Aug. 2023 – May 2026*

- Tutored CSE205, CSE230, CSE240, CSE310, CSE330, and CSE360 across object-oriented programming, data structures, programming languages, and core computer science.
- Supported CSE110 classes for 456 students, collaborated with five professors on instructional materials, and provided one-on-one programming instruction.
- Managed grading, attendance, lab sessions, and course support for 100+ students.

Xrossways INC. Gurugram, Haryana, India
Finance and Technology Intern *May 2022 – Aug. 2022*

- Conducted financial analysis, developed the company website, automated key processes, and contributed to three solar rooftop projects.

Projects

Vinext | *TypeScript, Vite, Next.js, Cloudflare Workers, Open Source* 2025 – Present

- Contribute to Cloudflare Vinext, a Vite plugin that reimplements the Next.js API surface for Workers and other runtimes; work spans App Router rendering, ISR caching, image optimization, and server-action forwarding.

LogWell | *TypeScript, PostgreSQL, Docker, SSE, OTLP, Node.js* 2024 – Present

- Built a self-hosted, PostgreSQL-backed logging platform with OTLP compatibility and real-time streaming, packaged for deployment with one Docker Compose file.

Clickfolio | *Workers, D1, R2, Queues, Durable Objects, WebSockets, Drizzle, Gemini* 2024 – Present

- Built an end-to-end resume-to-portfolio platform with PDF upload, Gemini parsing, queue-backed processing, live WebSocket status, and generated portfolio sites on Cloudflare's stack.

Alita Robot | *Go, MongoDB, Telegram Bot API, Docker* Feb. 2020 – Present

- Maintain an open-source Telegram moderation bot serving 300,000+ users across real communities, with anti-spam, scheduling, role management, locale support, and self-hosting.

Technical Skills

Languages: TypeScript, JavaScript, Python, Go, Java, C/C++

Frameworks: React, Node.js, Express, Vite, Astro, REST APIs

Cloud & Infrastructure: Cloudflare Workers, D1, R2, Queues, Durable Objects, Docker, Linux

Data & Systems: PostgreSQL, SQLite, MongoDB, WebSockets, SSE, Observability, Git, Gemini API, LLM workflows
